Classroom Complete Press

Interactive Digital Lesson Plans for use on your SMART Board™ or any other brand of Interactive Whiteboard.

Every software CD contains 2 versions of the lesson plan: a Flash version for use on any brand of Interactive Whiteboard and a Notebook™ version to use on your SMART Board™. The Notebook™ version also includes a SMART Response™ Comprehension Quiz to test student comprehension by using the SMART Response™ clickers.

System Requirements: Windows XP or higher, MAC OSX 10.1 or higher, 128 mb of RAM and minimum 50 MB free hard disk space.

NEW! Sight & Picture Words Series Digital Lesson Plans

Help students develop anchor words to increase their oral and written language proficiency with our Sight & Picture Words Series digital lesson plans for Interactive Whiteboards. Students will identify the 130 sight words and 120 common nouns using real life pictures as an aid. Using picture association, students will increase their sight word recognition, vocabulary and comprehension. Also included are the 100 high-frequency words. 80 ready-made screen pages include interactive activities, “Dolch” sight words, sight and picture words flash cards, crossword, word search and memory match game.

Learn how you can improve the planet by identifying your carbon footprint. Our resource focuses on how students can make an impact to help slow the rate at which our planet is changing by becoming a part of the worldwide effort to reduce the planet's carbon footprint. They will learn to identify their own, their school's, and finally their community's carbon footprint, by determining the causes of climate change through carbon dioxide that is released by human activities. Students will then be able to calculate the extent to which changes in their lifestyles can reduce their footprint. They can then extend this base of understanding to similar changes in their school and their community.

Water is essential for life on earth. How has climate change affected the water we drink, the oceans we fish and the lakes and streams we enjoy? Conserving these valuable resources by focusing our attention on protecting and respecting our fresh and ocean water is paramount. We offer a global scientific approach for middle school students by covering critical factors impacting on the Earth's water and how human activity and climate change is affecting it's purity and quantity as well as the health issues facing plant and animal life in fresh and marine water ecosystems. Our ready-to-use resource is written using simplified language and vocabulary, which are presented in a way that is easier for students to understand.

What is causing Global Warming? What are the effects? What can we do to stop or reduce Global Warming? We take a critical look from a scientific perspective that will help students separate fact from fiction in popular accounts in order to make informed decisions about products and lifestyle choices that affect the Earth System. We also look at rising sea levels and altered patterns of weather and agriculture, which are cited as direct consequences of Global Warming. Finally, we look at creative ways to reduce human consumption and output of waste, all in an effort to help clean up our planet. Our ready-to-use resource is written using simplified language and vocabulary, and presented in a way that is easier for students to understand.

What is waste? Where does it come from? What are we doing to clean it all up? These are essential questions for challenging times. Our Waste Management series takes a critical look at how we create and manage our waste, and what we can do to live in more environmentally friendly ways. Our resources examine important facts and issues such as: natural resources use, pre- and post-consumer waste, landfills, incinerators, smog, oil spills and space junk. From Hurricane Katrina and the tsunami in the Indian Ocean, to the Exxon Valdez oil spill. Also covered are waste prevention, recycling and conservation. Also, inspire your students with success stories about waste management from across the globe.

Here is everything you need for an exciting study of the natural world. Animal life, plant life, and the environment as a whole are all explored. First, we learn about classifying animals and what the difference is between warm-blooded and cold-blooded animals. Next, we look at cells, the building blocks of life. We will learn about the structures and functions of animal and plant cells, and single-celled versus multicellular organisms. Then on to the study of biotic and abiotic ecosystems, including producers, consumers and decomposers, and what the differences are between them. All concepts and vocabulary are presented in a way that makes it accessible to students and easier to understand.

This is science made easy! You don't have to be a rocket scientist to understand matter and energy. Discover what matter is, and isn't. Learn about solids, liquids and gases, properties and changes in matter, and the difference between a mixture and a solution. Then, explore the invisible world of atoms and molecules. Young scientists will be thrilled to learn why they are mostly empty space! Then we learn about the periodic table of elements, followed by unlocking the mysteries of energy including mechanical, thermal, sound, as well as light energy. We present these important concepts in an easy-to-understand way using simplified language and vocabulary.

Here is everything you need to know about the three very different Governments in North America. Students will learn: What is government and why do we need it? What kinds of governments exist in North America today? How are governments elected? We present a clear understanding and compare the varied branches of the Federal Governments as well as how the different systems of checks and balances work. Using simplified language and vocabulary, our resources clearly explain the structures and functions of different levels of government. Also, find out how a bill becomes a law, and why the U.S., Canadian and Mexican Constitutions are so important.

Help students gain a concrete understanding of the causes and outcomes of the Korean and Vietnam Wars as well as the events of the first and second Gulf Wars. We look at the background, causes, major battles, and key figures of the Korean and Vietnam Wars, and how they affected people back home. Following this, students will learn about the background of the region, the origins of the conflict, and the parties and key figures involved with the Persian Gulf War and the Iraq War. Using simplified language and vocabulary, and written in a way that is easier for students to understand, each resource is comprised of reading passages, student activities, crossword, word search, and overheads.

The American Revolutionary War was one of the most important events in United States history, where Britain's thirteen colonies established in North America gained independence and became their own country. The American Civil War was a watershed event, causing years of war and terrible destruction, but also signaling the last time an individual state ever seceded, and more importantly, the end of slavery. **WWI and WWII were terrible, expensive and tragic wars that changed the course of history.** Find out the background and causes that led to these wars, and why each raged on for years. Major battles, methods and weapons of war, and final outcomes are all explored.

Explore all that brings the world together with the impacts of Globalization. We use simplified language and vocabulary as we look at the debates and issues surrounding Culture, Society and Globalization, and how civil matters and lifestyle choices are affected. We explore the topics centered on immigration, outsourcing, nationalization and privatization, and the protection of intellectual property, by examining such themes as the history of currency and economic globalization, the Great Depression, international commercial law, multinational corporations, and foreign direct investment. Finally, become aware of the solutions and problems caused by technology and how it helps people function by discovering the process of Technology and Globalization.

Students will eagerly share their impressions about literature with our unique skill-based Reading Response Forms. Each book in the series contains 36 worksheets that are engaging, purposeful and graded appropriately. Each worksheet focuses on one of the following skills based on Bloom's Taxonomy: remembering, understanding, applying, analysing, evaluating and creating. Also included are a detailed implementation guide, a selection of hands-on activities, student assessment rubric, word puzzles and a comprehension quiz. The six overheads will assist the introduction of the skill focus and guide your students through the thought process. Ideal to supplement your present reading program or can be used for independent student work.

Become a master reader. Our resource allows students to advance their reading skills through three major elements. Students begin by gaining an understanding of the written text with Reading Comprehension. Students will then engage in the tools to understanding elementary-level literature with Literary Devices. Finally, students will gain the ability to not only understand what they have read, but how to build upon that knowledge independently with Critical Thinking. Using simplified language and vocabulary, and written in a way that is easier for students to understand, each resource is comprised of reading passages, student activities, crossword, word search, and overheads.

Our program is designed to make the writing process logical and easy to learn. We offer clear and concise instruction in the drafting and revision phases to assist your students in creating outstanding book reports. We also take the fear out of writing essays while giving your students the tools to successfully and comprehensively express their point of view. The learning objectives are based on Bloom's Taxonomy and you can also use this material to supplement your present writing program and to evaluate independent student work. Also included are a detailed implementation guide, a student assessment rubric, word puzzles and a comprehension quiz. The overhead transparencies are graphic organizers and will assist the introduction of the skill focus and in guiding your students through the writing process.
