Written to the NTCM five strands, our Principles & Standards of Math Series is made up of challenging problem-solving tasks which will push the boundaries of critical thought and demonstrate to students the importance of mathematics in the real world. The task sheets offer space for reflection, and opportunity for the appropriate use of technology. The drill sheets help students strengthen their procedural proficiency skills.

Learn how you can improve the planet by identifying your carbon footprint. Our resource focuses on how students can make an impact to help slow the rate at which our planet is changing by becoming a part of the worldwide effort to reduce the planet's carbon footprint. They will learn to identify their own, their school's, and finally their community's carbon footprint, by determining the causes of climate change through carbon dioxide that is released by human activities. Students will then be able to calculate the extent to which changes in their lifestyles can reduce their footprint. They can then extend this base of understanding to similar changes in their school and their community.

Reducing Your Own Carbon Footprint

What is causing Global Warming? What are the effects? What can we do to stop or reduce Global Warming? We take a critical look from a scientific perspective that will help students separate fact from fiction in popular accounts in order to make informed decisions about products and lifestyle choices that affect the Earth System. We also look at rising sea levels and altered patterns of weather and agriculture which are cited as direct consequences of Global Warming. Finally, we look at creative ways to reduce human consumption and output of waste, all in an effort to help clean up our planet. Our ready-to-use resource is written using simplified language and vocabulary, and presented in a way that is easier for students to understand.

Water is essential for life on earth. How has climate change affected the water we drink, the oceans we fish and the lakes and streams we enjoy? Conserving these valuable resources by focusing our attention on protecting and respecting our fresh and ocean water is paramount. We offer a global scientific approach for middle school students by covering critical factors impacting on the Earth's water and how human activity and climate change is affecting it's purity and quantity as well as the health issues facing plant and animal life in fresh and marine water ecosystems. Our ready-to-use resource is written using simplified language and vocabulary which are presented in a way that is easier for students to understand.

What is waste? Where does it come from? What are we doing to clean it all up? These are essential questions for challenging times. Our Waste Management series takes a critical look at how we create and manage our waste, and what we can do to live in more environmentally friendly ways. Our resources examine important facts and issues such as: natural resources use, pre- and post-consumer waste, landfills, incinerators, smog, oil spills and space junk. From Hurricane Katrina and the tsunami in the Indian Ocean, to the Exxon Valdez oil spill. Also covered are waste prevention, recycling and conservation. Also, inspire your students with success stories about waste management from across the globe.

Here is everything you need for an exciting study of the natural world. Animal life, plant life, and the environment as a whole are all explored. First, we learn about classifying animals and what the difference is between warm-blooded and cold-blooded animals. Next, we look at cells, the building blocks of life. We will learn about the structures and functions of animal and plant cells, and single-celled versus multicellular organisms. Then on to the study of biotic and abiotic ecosystems, including producers, consumers and decomposers, and what the differences are between them. All concepts and vocabulary are presented in a way that makes it accessible to students and easier to understand.

Enhance your middle school curriculum with our comprehensive resource that studies all Human Body Systems. Take your students through a fascinating study of the human body with clear, comprehensive and current information. We start off with an in-depth study of both the muscular and skeletal systems. Then we investigate the organs of the five senses, along with the respiratory system! We also look inside the kidneys and intestines, and then how a tiny sperm and egg cell can grow into a baby. Using simplified language and vocabulary, we then explore the major organs of four body systems and how they work to keep us alive and healthy.

This is science made easy! You don't have to be a rocket scientist to understand matter and energy. Discover what matter is, and isn't. Learn about solids, liquids and gases, properties and changes in matter, and the difference between a mixture and a solution. Then, explore the invisible world of atoms and molecules. Young scientists will be thrilled to learn why they are mostly empty space! Then we learn about the periodic table of elements, followed by unlocking the mysteries of energy including mechanical, thermal, sound, as well as light energy. We present these important concepts in an easy-to-understand way using simplified language and vocabulary.

Give your students a kick start on learning with all the required fundamentals for learning Force, Motion & Simple Machines. We unravel the complexities of force, motion and work, with examples of simple machines in daily life. Discover what a force is, and different kinds of forces that work on contact and at a distance. Using simplified language and vocabulary, students will also learn about linear, accelerating, rotating and oscillating motion, and how these relate to everyday life – and even the solar system. Finally we learn just how simple - simple machines are, including: levers, inclined planes, wedges, screws, pulleys, and wheels and axles.

Get the big picture about Space. From our solar system, galaxies and the universe, to space travel and technology, we've got it covered. Our resources have information and fascinating facts for students in grades 5 to 8. Learn about the Earth, the Moon, Comets, Stars and Constellations. Budding astronomers will be thrilled to learn about the Milky Way Galaxy, Black Holes, Nebulae, and even Quasars! Learn what it's like being on the crew of a shuttle mission to the International Space Station. Simplified language and vocabulary are used to teach these concepts and more, including gravity, cycle of day & nighttime, cycles of seasons & years, moon phases, ocean tides, planetary orbits, the lunar cycle, and the speed of light.

The American Civil War was a watershed event in United States history, causing years of war and terrible destruction, but also signaling the last time an individual state ever seceded, and more importantly, the end of slavery. World War I was to be the “war to end all wars” due to the never-before-seen destruction it unleashed. But by 1939, the world was at war again, dragging even more countries into conflict and causing even greater turmoil. Find out the background and causes to each of these wars, and learn why each raged on for years. Major battles, methods and weapons of war, final outcomes and the wars’ impact on and significance to the world today are all explored.

Help students gain a concrete understanding of the causes and outcomes of the Korean and Vietnam Wars as well as the events of the first and second Gulf Wars. We look at the background, causes, major battles, and key figures of the Korean and Vietnam Wars, and how they affected people back home. Following this, students will learn about the background of the region, the origins of the conflict, and the parties and key figures involved with the Persian Gulf War and the Iraq War. Using simplified language and vocabulary, and written in a way that is easier for students to understand, each resource is comprised of reading passages, student activities, crossword, word search, and overheads.

Describing Words
 Words that name people, animals, places or things are called nouns.
 Words that describe nouns are called adjectives.
 Look in your story for nouns.
 Find the adjectives that describe the nouns.
 Complete the chart. Look at the example.
 Write the nouns that you found.
 Then write the adjectives from the story.

| Adjectives | Nouns - people, animals, places, things |
|------------|---|
| fluffy | dog |
| | |
| | |
| | |
| | |
| | |
| | |
| | |

Character Report Card
 Complete a REPORT CARD to tell how the character behaved in this story.
 Use facts from the story.

Students will eagerly share their impressions about literature with our unique skill-based Reading Response Forms. Each book in the series contains 36 work sheets that are engaging, purposeful and graded appropriately. Each worksheet focuses on one of the following skills based on Bloom's Taxonomy: remembering, understanding, applying, analysing, evaluating and creating. Also included are a detailed implementation guide, a selection of hands-on activities, student assessment rubric, word puzzles and a comprehension quiz. The six overheads will assist the introduction of the skill focus and guide your students through the thought process. Ideal to supplement your present reading program or can be used for independent student work.

Become a master reader. Our resource allows students to advance their reading skills through three major elements. Students begin by gaining an understanding of the written text with Reading Comprehension. Students will then engage in the tools to understanding elementary-level literature with Literary Devices. Finally, students will gain the ability to not only understand what they have read, but how to build upon that knowledge independently with Critical Thinking. Using simplified language and vocabulary, and written in a way that is easier for students to understand, each resource is comprised of reading passages, student activities, crossword, word search, and overheads.

Our program is designed to make the writing process logical and easy to learn. We offer clear and concise instruction in the drafting and revision phases to assist your students in creating outstanding book reports. We also take the fear out of writing essays while giving your students the tools to successfully and comprehensively express their point of view. The learning objectives are based on Bloom's Taxonomy and you can also use this material to supplement your present writing program and to evaluate independent student work. Also included are a detailed implementation guide, a student assessment rubric, word puzzles and a comprehension quiz. The overhead transparencies are graphic organizers and will assist the introduction of the skill focus and in guiding your students through the writing process.

Increase students' sight word recognition, vocabulary and comprehension as you help them identify 130 sight words and 120 common nouns using real life pictures as an aid. Picture associations will aid young readers in developing anchor words to increase their oral and written language proficiency. Sight words are words that must become automatically recognizable by the reader because they are often not pronounced or spelled in expected ways. We also include the 100 high-frequency words that make up almost 50 percent of everything that we read as adults. Having this bank of high frequency words is thus essential to building fluent reading skills. Reproducible work sheets include: mixed-up words, boxed words, cloze sentences and puzzles.

Increase vocabulary, sight word recognition and comprehension as you help your students identify the correct pronunciation of short and long vowel phonograms (word families) using real life pictures as an aid. We also highlight the “Dolch” high frequency words which encourage beginner reading skills. As students begin to read and understand more about the onset and rhyme connection found in word families, they will begin to think of words as not only a series of individual letters and sounds, but as easily recognizable segments or chunks of language. Reproducible work sheets include: rhyming, writing, poetry, cloze sentences, riddles and chunking. Based on Bloom’s Taxonomy, our resource can be used to strengthen children’s reading, writing and thinking skills.

| 4 solution | pertaining to pre | |
| 5 emissions | substances in the | |
| 6 alternative | existing only in a | |
| 7 limited | a means to solve | |
| 8 greenhouse gases | a different way | |

© CLASSROOM COMPLETE PRESS

BEFORE YOU READ – Help students make connections between what they know and what they will learn.

DIFFERENTIATED LEARNING – Necessary for some, beneficial for all.

NAME: _____

Reading Passage

Transportation

Transportation, or the movement of people and goods, is one of the largest sources of greenhouse gas emissions. People are developing alternative fuels to help lower greenhouse gas emissions from vehicles. Many vehicles are now being made with technology that gives them greater **fuel efficiency**. A car that uses less fuel to go a certain distance is more efficient. Have you ever heard of a **hybrid car**? Hybrid technology allows the car to use energy from braking in order to drive. Hybrid vehicles have a high fuel efficiency.

© CLASSROOM COMPLETE PRESS

READING PASSAGE
All the relevant information curriculum based, Bloom's Taxonomy for reading comprehension. (1-2 pages for each of the 7-9 sections)

STOP FLAG – A question to see if the student is comprehending the information.

STOP What is a hybrid vehicle?

Public transportation can help lower greenhouse move more people using less fuel than if people use commuter trains that run on electricity instead pollution in the city. It could also result in less over companies use alternative sources of energy to bicycles for short trips instead of using vehicles is gas emissions.

The transportation of goods also results in a lot of to cut down on these emissions is for people to be where they live. A lot of energy is used to transport for example. If people buy foods grown nearby, for their transport.
